

ZANI EKO FITRIYANTO 22312150

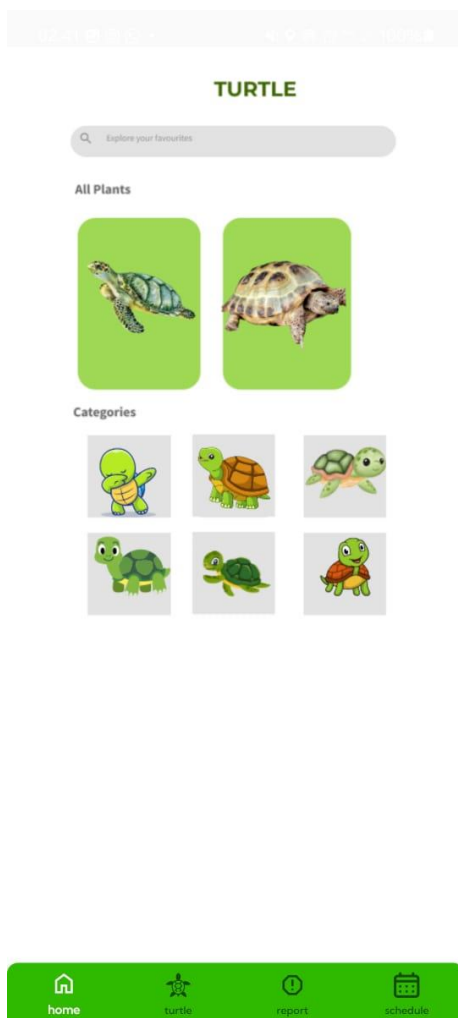

DOKUMENTASI

Saya membuat Fragment Navigasi Bottom

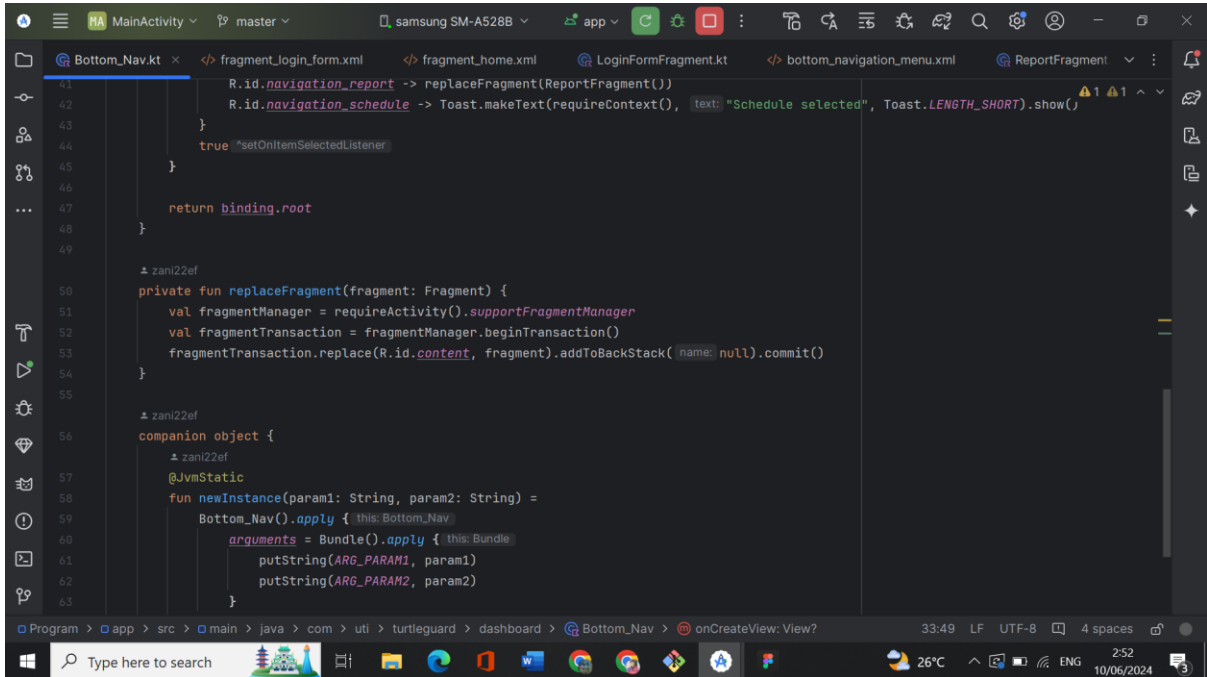

Membuat fungsi Replacement Fragment

Mengkoneksi antar fragment antar bottom

Menambah konten Homepage

Fungsi Replacement Fragment

```
41 R.id.navigation_report -> replaceFragment(ReportFragment())
42 R.id.navigation_schedule -> Toast.makeText(requireContext(), text: "Schedule selected", Toast.LENGTH_SHORT).show()
43 }
44 true *setOnItemSelectedListener
45 }
46
47 return binding.root
48 }
49
50 zani22ef
51 private fun replaceFragment(fragment: Fragment) {
52     val fragmentManager = requireActivity().supportFragmentManager
53     val fragmentTransaction = fragmentManager.beginTransaction()
54     fragmentTransaction.replace(R.id.content, fragment).addToBackStack(name: null).commit()
55 }
56
57 zani22ef
58 companion object {
59     zani22ef
60     @JvmStatic
61     fun newInstance(param1: String, param2: String) =
62         Bottom_Nav().apply { this: Bottom_Nav
63             arguments = Bundle().apply { this: Bundle
64                 putString(ARG_PARAM1, param1)
65                 putString(ARG_PARAM2, param2)
66             }
67         }
```
